Mercury	Mercury
600V12	600V12
600.00 HP	600.00 HP
Fuel: Diesel	Fuel: Diesel
Location:	Location:
Generator 1 KW hrs	Generator 2 KW hrs

## Summary / Description

Brought to life by two companies with over 40 years of superyacht and performance marine experience between them, it is our pleasure to introduce INFINITI 60 POWERCAT to the market. This new 18.28m foil-assisted catamaran by multi-award-winning British yachtbuilders Concept Yachts and Infiniti Yachts builds on the success of the smaller Infiniti 36 and Infiniti 52 models. With its innovative DSS foiling system, resin infused carbon fibre construction and superyacht finish, the Infiniti 60 Powercat will break new ground not only in terms of performance but also in style, reduced emissions and sustainability.

The Infiniti 60 Powercat can be customised for use as a superyacht tender, a marine limousine, competition fishing or a liveaboard yacht. Offered in either the Coupe or Grand Tourer Flybridge with a configuration of 2 or 3 double cabins plus crew cabin option. She can also be powered by petrol, diesel or electric propulsion and the resin infused Carbon Fibre construction means uncompromising strength to weight ratio as well as unparalleled performance.

Stunningly beautiful and versatile, the foil-driven technology reduces fuel consumption by up to 35%, increasing range and comfort at the same time. Her uniquely modest beam means she is able to be berthed in a conventional slip, avoiding the need for double or extra sized berthing. She is also “beachable”, meaning transitioning from sea to land is done with great ease.

The Infiniti 60 Powercat has a top speed (Coupe) of 40 knots. Partnering with Design Unlimited for the interior design, her incredible performance is matched by comfort and style, making her attractive to even the most discerning owner.
