## Summary / Description

### Take advantage of purchasing a Charter-ready catamaran Bali 4.4, with 100 % Bonus Depreciation benefits

A smart move for U.S. buyers looking for tax advantages. Bali 4.4 is delivered in the British Virgin Islands, with no import duty payable, making ownership and charter setup seamless and cost-effective

#### Bali 4.4. overview

Designed with long-term cruising comfort in mind, the **Bali 4.4** is the ultimate catamaran for couples & families who dream of exploring the world—without sacrificing the feeling of home. With her spacious layout, smart design, and signature open-concept living, the Bali 4.4 delivers effortless luxury, all in a manageable 44-foot package. Forget the compromise between comfort and performance—this boat gives you both. From quiet anchorages to bluewater crossings, the Bali 4.4 is built for real living, not just quick getaways.

- Expansive living space with the Bali “garage door” that opens the entire saloon to the aft cockpit
- Generous owner’s suite with a walk-around queen bed, ample storage, and a private ensuite
- Fully-equipped galley with household-sized fridge/freezer, oven, and plenty of prep space
- Forward cockpit and lounge area for sunrise coffees or sunset cocktails, shielded from the wind
- Easy sail handling with all lines led to the helm—perfect for short-handed sailing
- Massive storage for provisioning and gear, ideal for extended voyages

#### Construction

Born from the renowned Catana Group with over 30 years of boatbuilding expertise, Bali catamarans are constructed using advanced vacuum infusion techniques with high-quality composite materials. This process ensures maximum strength with minimal weight, resulting in a boat that is both sturdy and efficient under sail. The solid foredeck and rigid forward cockpit—hallmarks of the Bali design—are reinforced with high-density foam cores, delivering unmatched structural integrity and comfort at sea. Unlike traditional catamarans with trampoline bows and separate cockpit/saloon areas, Bali’s monobloc construction allows for seamless, one-piece integration of living and sailing spaces. This approach improves stiffness, reduces flex, and enhances overall comfort—whether you’re underway or on anchor.

- Hull built in one piece for greater stiffness
- GRP / PVC foam core sandwich polyester resin infused. (No balsa wood core material)
- Anti-osmotic osmotic vinylester underwater hull protection

#### Bali 4.4 Accommodations

Aft cockpit/saloon fully open space:

- Signature Bali electric pivoting door
- Sliding side windows
- Long dining table
- Bench seating

Solid foredeck lounge with large seats and integrated storage with cushions Flybridge helm station and Skylounge 4 Cabin 4 Head Layout
