Summary / Description

McConaghy, the exclusive build partner of the BlackCat Superyachts BlackCat30, has joined forces with renowned naval architect Malcolm McKeon, interior designer M2Atelier, Southern Spars for the carbon rig, and North Sails for the sails. This partnership pedigree is unparalleled in the high-performance superyacht catamaran industry.

The BlackCat series, conceived by champion Australian yachtsman Mitch Booth, has garnered a reputation for exceptional design and performance. With over 40 years of experience racing various catamarans, Booth has amassed two Olympic medals, a dozen world titles, and numerous awards, including Australian Yachtsman of the Year in 1992 and 1996 and Dutch Yachtsman of the Year in 2004.

The BlackCat 30 boasts a spectacular interior design by M2Atelier, accommodating up to eight guests in six cabins and quarters for four crew members. The open and spacious layout features a single-level main deck saloon large enough to host grand dinners and entertaining gatherings.

The BlackCat 30 offers numerous advantages over traditional monohulls. With its fast and comfortable sailing capabilities, it can reach speeds of up to 32 knots and cruise at 20 knots. Its low heel angle and stable platform provide a secure and enjoyable sailing experience.

Each design in the BlackCat range is meticulously tailored to meet the specific preferences of its clients, down to the smallest detail. The lightweight carbon fiber construction of the yachts ensures efficient sailing and motoring, minimizing emissions and, in some cases, eliminating them entirely.

The BlackCat range stands at the forefront of cruising performance, combining cutting-edge design with exceptional performance and lightweight construction.
